

KIDS AT HOME MISSION

Kids At Home was created in 1984, as a major strategy towards improving the child care system in Canada.

Kids At Home main focus is on family day care and In-home child care services. Our goal is to see Canadian children access exceptional, early learning and child care services that result in the physical, social, emotional, intellectual, spiritual and cultural development of the whole child. By providing on-going professional development for caregivers, we believe that a child's uniqueness will be considered as they are loved, cared for, and stimulated to grow and learn.

Our administrative staff and advisory board members have a wealth of experience in all forms of early childhood developmental practices and bring the depth of their experiences to our partnership with parents.

As Kids At Home continues our journey, we are striving to develop caregivers that are knowledgeable, skilled, open-minded and flexible in their approach to young children—caregivers who have acquired values that impact upon their lives in such a way, that they are motivated to impart a sense of values to the children in their charge. Additionally, our Caregivers can aid parents in making that stressful transitional period to formal schooling, a positive experience.

To foster our mission, Kids At Home continues to seek approaches that will enable us to consistently provide an home-environment of high-quality care and support, intellectual freedom, and mutual trust. We continue to promote on-going professional development for all our associates, and encourage parents' interests and input into their child's total development ... we all

have so much to learn from young children, and hope that parents can share all the delight their child sees and experience, as they grow.
